Introduction

- Taco Bell Corp. is an American multinational chain of fast-food restaurants founded in 1962 by Glen Bell in Downey, California. Taco Bell is a subsidiary of Yum! Brands, Inc.
- There are more than 30 countries where Taco Bell has more than 8000 restaurants.
- Here, I have selected the Taco Bell Kottawa restaurant as my reference for the lighting review.

TYPES OF LIGHTS

- Installation Way - screw
- Light colors - WHITE
- Color Rendering Index - 70
- Color temperature - 4000K
- Luminous Flux: 1000lm

Incandescent lights

- These bulb give vintage theme where the ambiance is designed to evoke a sense of nostalgia or a specific time. Incandescent bulbs, especially those designed to resemble classic Edison bulbs, are popular choices for these themes because they contribute to the overall vintage aesthetic and can complement other retro-style decor elements.

Incandescent lights - specification

- Type - Incandescent Bulbs
- Material - Glass
- Working Lifetime- 100000 hours
- Light colors - Warm White
- Color Rendering Index - 70
- Color temperature - 2200K
- Luminous Flux: 600lm

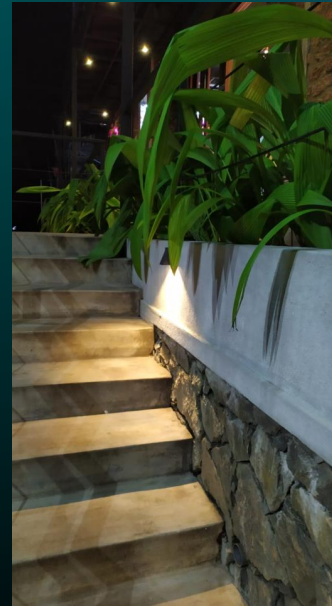

Other lighting enhancement strategies

- During the day, they effectively use natural light by placing windows all around.
- At night, the windows have glass panels that reflect the indoor lights, making the space brighter.

Mood and atmosphere – Outside

- Pathway lights ensure safe navigation.
- Creates a calming and relaxing vibe.
- Provides an inviting ambiance.
- It illuminates the restaurant's name or logo in a bold, eye-catching manner

Mood and atmosphere – Dining area

- Warm white lights are used to accentuate the vibrant colors of the dining tables, emphasizing their wooden texture.
- Creates a fun and lively atmosphere.
- Provides a peaceful ambiance, offering a relaxing escape from everyday hustle and bustle.

Mood and atmosphere – Kitchen, serving area

- Cool yellow lights
- Convey a sense of cleanliness and orderliness.
- Low visibility and effectiveness.

Identified Issues

- Multiple light sources overwhelm the eye, making it difficult to focus on specific elements in the space. This can distract from the overall ambiance or intended focal points of the area.
- Excessive lighting can cause harsh glares and reflections, on shiny surfaces like glass or polished materials.

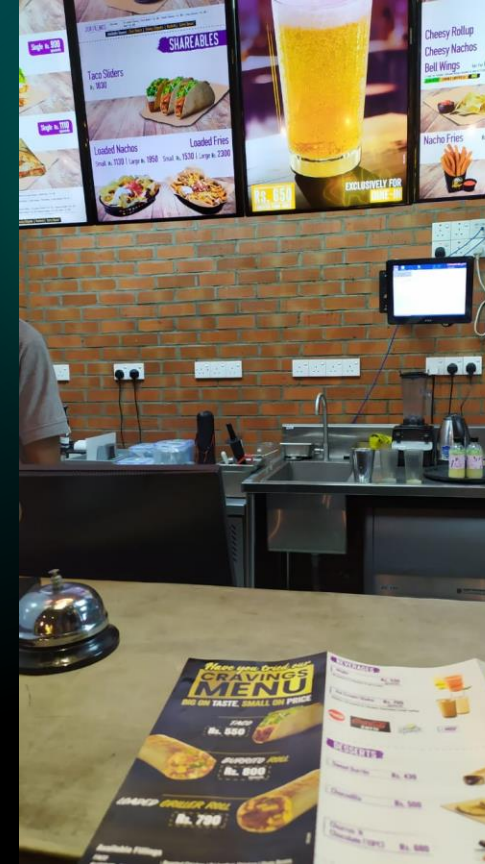

Identified Issues

Proper task lighting in the serving area helps staff work comfortably by reducing eye strain and fatigue caused by poor lighting.

Solutions:

- Remove unnecessary lights from the dining area to create a more comfortable environment for the eyes.
- Adding spotlights to the serving area helps improve visibility.

Thank You ..!
